

Authorized Dealer: Sales and Service

NH INSTRUMENTS

No. 2072, 3rd cross Pipeline road, Santhosh Nagar,
T. Dasarahalli, Bangalore 560057, Karnataka.

Email: nhinstruments24@gmail.com

Mobile: 8660651375, 8660942368

Accuracy and Resolution

1. Piston Stroke : **200mm**
2. Load Resolutions : **50000 / 100000 Counts**
3. Load Accuracy : $\pm 1\%$ **of shown reading**
4. Displacement resolution : **0.01 mm**
5. Displacement Accuracy : $\pm 0.5\%$ **of shown reading**
6. Extension Resolution : **0.001 mm**
7. Extension Accuracy : $\pm 1\%$ **of shown reading**

Note :

1. **EE2 is 2 mm Extension and 25/50 mm Gauge Length Extensometer.** It is used for calculating **0.1, 0.2 up to 1% Proof Stress** and proof load values and **Young's Modulus / Modulus of elasticity**
2. **UTES (Servo) Machines** will have the facility of conducting **Stress Rate Control / Load Rate Controlled / CH. Strain Control Tests** as per ASTM E8, ISO 6892 and IS 1608 (Control Method A2 and Control Method B in ISO 6892 / IS 1608). **Achieved Stress Rate Control / Load Rate Controlled / CH. Strain Rate controlled Graphs can be printed on the test reports as per NABL requirement**
3. **Warranty : 1 years from the date of installation for all Electronic Control Panel. 1 year for Motors and other electronic components**

HYDRAULIC SERVO additional features (Only for Servo):

1. Load Rate accuracy control $\pm 3\%$ or ± 3 kN of set Load Rate within specified limits
2. Displacement Rate accuracy of $\pm 2\%$ or ± 2 mm of set Disp. Rate
3. Real time display of Load Rate and Displacement Rate
4. Working Auto Detect yield facility for changing from Load Rate to Displacement Rate
5. Hold Load upto 250 Secs with appropriate valve settings.
6. Load Rate / Stress Rate can be set in required units

UTE Hydraulic Manual Gripping Machine

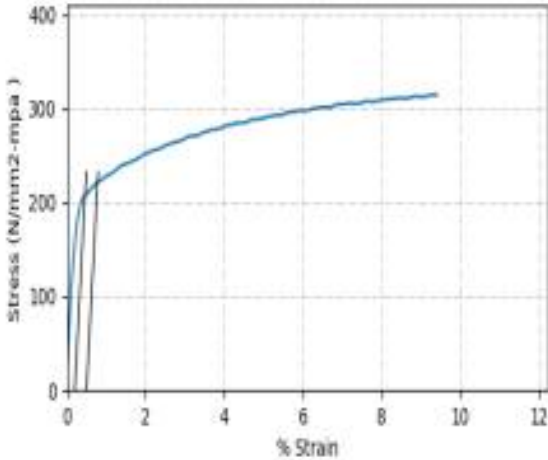

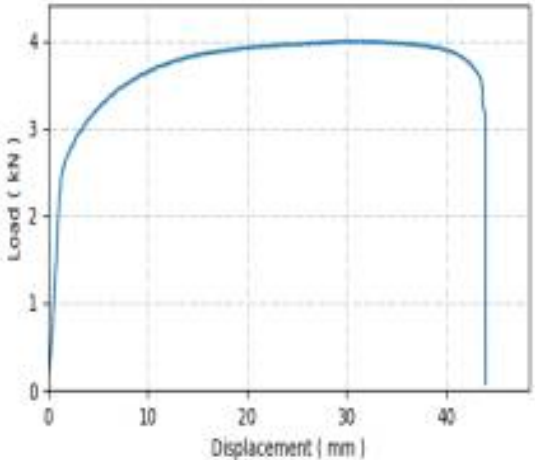

Electronic Hardware Points:

1. 50000 Counts over the range for Load
2. 100,000 counts optional for load
3. Extensometer Facility integrated by default in Motherboard
4. Single Point Controller Calibration For Load and Extensometer.
 - a. No potentiometers required
 - b. No PC software required
5. Peak Load displayed on the controller post test automatically.
6. Supports extensometer of any make
7. Machine turn off on rupture - No Pc software required
8. RS485 Communication protocol with PC software - works upto 100 meters

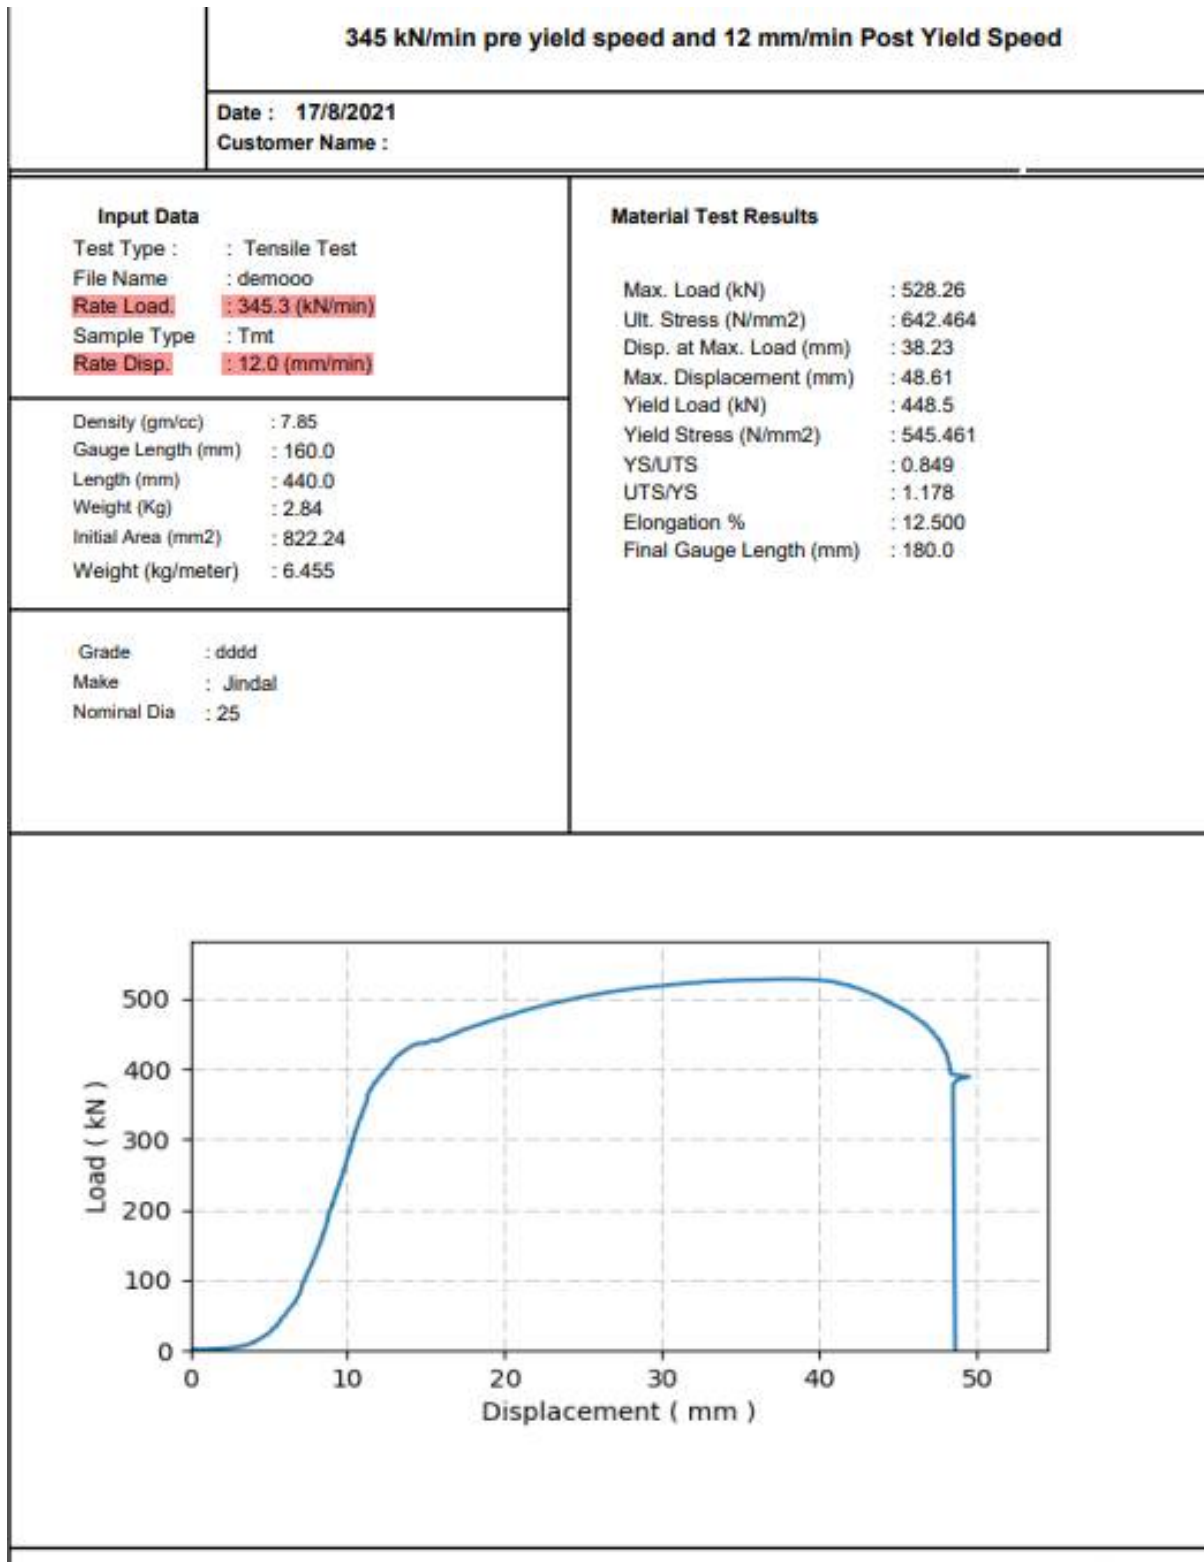

Software Points

1. Load / Displacement / Extension display on Home Page.
2. Video Extensometer Integration
3. Sample type customization
4. Real time graph in selected units for Load and Stress.
5. Integration of multiple extensometers in one system
 - a. Can save calibration for each one of the separately.
6. Real Time Load Rate/ Disp Rate / Stress rate display in Servo Mode
7. Ability to Freeze real time graph
8. Perfect yield calculation as per customer demand
 - a. Accurate calculation from graphical method
 - b. ASTM method offset selection from 0.1 % to 1 %
 - c. Yield calculation method can be change post test
9. Ability to select / unselect results displayed in printed report.
10. Ability to change input parameters (Gauge length / CS. Area) post test.
11. Ability to add up to 10 extra Key-Value Pairs as input. Customer can use these key value pairs as per his requirement
12. Ability to add up to 2 extra Key-Value Pairs in the report header. Customer can use these key value pairs as per his requirement
13. Ability to export reports to excel with graphs.
14. Ability to print all Test Data Points of a selected test in selected units.
15. Graph Cursor - Zoom - Pan Facility
16. Unlimited Tests in one batch file.
17. Proof stress calculation from 0.1 % to 1 %
18. Report Customization as per customer demand.

Extensometer Test - Stress vs Strain and Load vs Displacement

Date : 10/1/2023 Customer Name : Tata 4 mm sample Trial	
Test Type : : Tensile Test - Stress Vs Strain File Name : : rva1_demo1_45deg Sample Type : : Rectangular Rate Disp. : : 5.0 (mm/min)	Material Test Results Max.
